

## SuperNop Banner Slider Plugin Support Documentation

Create new banners on your store yourself. To creating banners you don't need any extra knowledge of web designing. Just you have to create images and that's it.

Our banner and slider plugin will help you to create new banners and sliders on your front side store. Creating banners was never so easy in nopCommerce.

There are three types of banners available in this plugin.

1. Slider

Everyone knows about the sliders. If you will select banner as slider it will display banner as slider that will get change automatically.

2. Rotate

This type will change your picture on every page refresh. This will rotate your picture list based on the picture order.

3. Random

This is same as Rotate but this type will show pictures randomly. There will be no patterns of loading pictures.

### How to install banner slider plugin?

Copy plugin folder into your **/Plugins** folder and from admin panel Local Plugin list try to reload plugin.

After doing this plugin will display into the List with SuperNop Logo. Go to the plugin and Click to install.

The plugin is widget type but you don't have to active it manually, while installing it will be mark as Active Automatically.

After completing the installation process you will see there are two new menus in admin area.

## Getting started with banner slider plugin

We presume you have already installed plugin on your store. We will start from the Configurations.

For configurations please go to admin panel, you will see new menu items as **Banner Position** and **Banner List**.

### 1.0. Admin Configurations : Banner Position

What is banner position?

Banner position is the area/position where your banner will display on the front side. Create new area/position by clicking on Add new button. You can also edit existing banner position by clicking on Edit button.
