1.3. Enable Default Nop Lightbox:

Select this if you want to use default light box plugin, picture gallery view of nopCommerce with product zoom plugin. By clicking on the product picture default nopCommerce light box will open.

1.4. Select Zoom Effect or Style:

There are five types of zoom effects or styles.

a. Basic Zoom

This zoom effect will add simple zoom window beside the product picture and show product zoom picture in that area.

b. Tints Zoom

This zoom effect will add background color effect on the main picture while zooming for better zoom area understanding.

c. Inner Zoom

This zoom effect will start zooming into the main product picture. This will not show any addition box/window.

d. Lens Zoom

This zoom effect will start zooming into the same product picture but this will show with lens effect.

e. Mouse wheel Zoom

This effect will work with the mouse wheel, by scrolling the mouse wheel zoom in and zoom out will work.

1.5. Enter Height of Zoom Window:

Please enter zoom window height in integer. Make sure you do not add any prefix or postfix characters. E.g. 300

1.6. Enter Width of Zoom Window:

Please enter zoom window width in integer. Make sure you do not add any prefix or postfix characters. E.g. 300

1.7. Use Zoom Easing:

Select this setting for easiness of zooming effect. This will give smoothness while moving zoom area. We highly recommend this effect for best zooming experience.
